PROFESSIONAL SUMMARY

Technical Lead with 14+ years of software experience, working primarily on applied AI today, based in Bengaluru. I build LLM-backed tooling with TypeScript and LangChain: an agent that triages bug reports by checking them against the code across connected repositories, plus team-wide AI workflows (Jira stories, Figma designs, VBCS development, a Codex skill shared across the team). Currently learning LangGraph, RAG and LLM evaluation. My security-research background (twice in Meta's bug bounty Hall of Fame, 2015 and 2022) shapes how I test and harden AI features.

SKILLS

LangChain, TypeScript, Node.js, RAG and LLM evaluation (learning), LangGraph (learning), React, JavaScript, Java, Spring Boot, GraphQL, PostgreSQL, Docker, Kubernetes, Jenkins, Git, Vercel, Webpack, Micro-frontends, Next.js

WORK EXPERIENCE

Technical Lead, Oracle India Private Limited | Bengaluru, India | Jul 2021 - Present

- Built a TypeScript/LangChain agent that triages bug reports from the Anthropic Glass project against the actual code across connected repos, cutting duplicate and wrongly raised issues.
- Drove AI adoption in the team: AI-written Jira stories, Figma designs and VBCS app development (in-house Oracle products).
- Created a Codex skill for an internal tool that automated everyday workflows; adopted across the team.
- Built reusable React.js UI components that met 100% of Oracle Redwood standards, adopted across CX teams.
- Integrated the React components into the Oracle JET framework using Preact-Compat for better performance.
- Extended the micro-frontend setup to run OJET modules next to React, so teams reuse components across both.
- Migrated apps from VMs to a Kubernetes cloud setup.

Tech Lead, BNY Mellon Technology Pvt Ltd | Chennai, India | Oct 2017 - Jul 2021

- Led development of an Orchestration portal handling 100k+ records.
- Improved app performance 50% through code optimization, caching and cloud work.
- Led the move to a containerized architecture with CI/CD: deployment time down 30%, release cycles 25% shorter.
- Built a React/Tailwind UI over a CLI-based deployment process, removing manual errors.

Senior Software Developer, KRDS | Chennai, India | Aug 2016 - Oct 2017

- Built web apps and chatbots for AXA and Thomas Cook social media campaigns.
- Helped build AXA's Employee Customer Engagement app, managing 1000+ employee Facebook accounts and posting insurance updates from agent profiles.

Software Engineer, TCS | Chennai, India | Sep 2012 - Aug 2016

- Developed the Strategic Lead Management (SLR) and E-Statement applications.

SECURITY RESEARCH

Marathon Photo Platform, Responsible Disclosure | Sep 2026

- Found an IDOR flaw in a race photography platform: a valid order ID plus a changed bib number returned another runner's high-resolution photos for free and exposed the buyer's email and payment status. Reported the same day; fixed and confirmed. Write-up on Medium.

BNY Mellon, Cyber Steward Award | Jun 2021

- Found a serious vulnerability in BNY's competition portal, built a proof of concept and reported it to the Security Head. Recognized with BNY's Cyber Steward award.

Samsung India, Security Acknowledgment | Jul 2017

- Found a vulnerability in Samsung India's shopping portal allowing high-value products to be booked at very low prices. Reported voluntarily; acknowledged with a reward (Samsung Gear 2 watch).

Zerodha, Security Acknowledgment | Feb 2016

- Found a vulnerability in Zerodha's registration flow that bypassed authentication checks and gave access to extra services without the registration fee. Reported voluntarily; acknowledged by Zerodha's security team.

TicketNew, Responsible Disclosure | Sep 2015

- Found a flaw in TicketNew's booking system allowing an entire theater to be booked for the price of one ticket. Reported voluntarily.

Facebook (Meta), Responsible Disclosure Program | Sep 2015

- Reported 6+ high-severity issues through Facebook's Responsible Disclosure Program (IDOR and reverse engineering findings) and worked with their security team to fixes. Received US$25,000 in total rewards. Write-ups on Medium.

PERSONAL PROJECTS

PokerPeeker - PlanITPoker Vote Audit, Chrome Extension | Personal project | Apr 2026

- Chrome extension that audits PlanITPoker votes in a browser side panel: spots vote conflicts, mirrors a chosen participant's vote, exports room audit data as JSON. Published on the Chrome Web Store.

VBCS Variable Inspector, Chrome Extension | Personal project | Mar 2026

- Chrome dev tool for debugging Oracle VBCS/OJET apps: inspects runtime bindings and namespaces, with state manager, query, export/import and backup/restore of app state. Published on the Chrome Web Store.

When-to-Leave Commute Advisor, Web App | Personal project | Nov 2026

- Web app that compares leaving now versus later for a commute using live HERE traffic data, with LEAVE/WAIT advice and alternative routes on a live traffic map. Deployed on Vercel.

WebSocket Debugger + Security Workbench, Chrome Extension | Personal project | 2026

- Chrome extension (TypeScript, MV3) for WebSocket work: a React debugger with explicit target context, plus an authorized, host-bound Security Lab that exports redacted evidence. Published on the Chrome Web Store.

AWARDS

- Listed in Meta's bug bounty Hall of Fame twice (2015 and 2022) for responsibly disclosed security reports, US$25,000 total rewards.
- Top 10 in the BountyCon 2022 CTF (Singapore), earning a place at the live bug bounty event.
- BNY Mellon Cyber Steward award (2021) for a responsibly reported vulnerability.
- Samsung security acknowledgment and reward (2017) for a critical shopping-portal vulnerability.
- Zerodha security acknowledgment (2016) for a responsibly reported registration-flow vulnerability.

CERTIFICATIONS

- Professional Scrum Master I (PSM I), Scrum.org - Feb 2024.
- Oracle Cloud Infrastructure (OCI) Foundations Associate.

EDUCATION

Bachelor of Technology, Information Technology, Sri Sairam Engineering College | Chennai, India | 2008 - 2012
